FAMILY TREE PRIVATE SCHOOL

My parents and i decided to attend this private school back around 7th grade. It was very different at first. Mostly because my mom wasn't sure if what she was doing was right or wrong. Me either, lol. So, I just followed along and went and met other private home schoolers. Years have gone by and im now graduating from Family Tree. I didn't have any problem learning. Nancy was only a phone call or a email away at all times. Im really not sure if i would have been a graduate coming from my local high school. I can say private school the learning is endless and where a person excels in every direction. I know because i am one of them. I hope my nephew attends Family Tree soon.
